DETAILED ACTION

Election/Restrictions

1. Upon further consideration and Applicant's Election filed 6/6/2005, the restriction requirement with respect to Groups I and II has been withdrawn.
2. Applicant's election with traverse of species (A)(3) in the reply filed on 6/6/2005 is acknowledged. The traversal is on the ground(s) that species (A)(1)-(A)(6) constitute a reasonable number of species. This is not found persuasive because searching for six distinct methods of forming a multilayer structure constitutes an undue burden.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 21-22, 24-26, 28-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/6/2005.

Specification

4. The use of various trademarks have been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Art Unit: 1773

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3, 5, 7-8, 16, 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3, 5, 7-8, 16, 31 are vague and indefinite because of the recitation of trademarks or tradenames or product names.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1773

8. Claims 1-20, 23, 27, 31-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over MITTEN ET AL (US 2002,0182352).

MITTEN ET AL discloses a coextrudable film comprising a surface layer selected for durability and stain resistance and a second layer selected for good bonding with the surface layer and a substrate layer, wherein the surface layer comprises polyester (e.g., PCTA) and the second layer comprises other polyesters (e.g., PETG), wherein the film is directly bondable or fusable to a substrate layer (e.g., polyolefin) without an intervening adhesive. The polyolefin core layer can be printed and/or decorated. (paragraphs 0041,0043, 0046, 0059, 0062, 0066-0068, 0077)

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to utilize a polyester resin having good bonding properties as the second layer of the film in MITTEN ET AL to allow a durable polyester surface layer to be bonded to a disparate substrate or core without the use of additional adhesive layer. One of ordinary skill in the art would incorporate indicia and/or markings into the resulting laminate (claims 10, 27, 30-32) in order to produce laminates or articles with informational or evidentiary applications.
